

Abbotts Leigh

Location: Bristol, UK

Material Used: ThermoWood Iroko

Our ThemroWood Iroko completely transformed this build, adding warmth and character, marrying with the industrial accents. Our ThermoWood Iroko is a very popular choice for architects and builders when searching for a durable, environmentally friendly cladding option.

Offering 30+ years durability, 100% natural properties and is 100% recyclable. In addition to this, dimensional stability is a key benefit of our ThermoWood Iroko, the thermal modification process eliminates bending, twisting and cupping, in addition to resistance to rotting and warping. Making it an excellent choice for any build project.
